INT.CL. : H01R 11/01

TITLE : WIRING CONTROL DEVICE

ABSTRACT : PURPOSE: To easily and accurately control connection work and a connecting condition between primary side signal conductors and secondary side signal conductors in a wiring control device.

CONSTITUTION: Connection between primary side signal conductors L11 to L1n and secondary side signal conductors L21 to L2m connected to a programmable wiring part 21, is switched by electrically controlling switches S11 to Snm constituting the programmable wiring part 21 by a control signal from a control part 22. At the same time, a connecting condition in the programmable wiring part 21 can be displayed by a display part 25.
